

# PicturesToExe

Create professional slideshows in PicturesToExe.  
Add photos, video clips, & music.  
Output for PC, Mac, DVD, HD video, & YouTube.

# 9

# Beckham Digital

## PicturesToExe 9 has been launched

Well, it has been quite some time since we have seen an upgrade to PicturesToExe, but I think we can safely say, this is the most comprehensive upgrade we have ever seen with this software. Not only do we have great improvements and new tools, but PicturesToExe 9 is now a large step closer to being a fully working program on Mac computers.

For a fully Mac compatible version we need just a little more patience and remember what a big job this is for the developers, but lots of new stuff for us all to play with. A full features list is shown below.

## What's New in PicturesToExe 9 – New Beckham Digital Videos

As you may have expected with such a major upgrade we have been busy making tutorials to take you through what's new in PTE-9.

This category of videos is much more than a simple what's new list. We show you how it all works and you will learn a lot from these videos. These videos are download only, but in our test on a moderate broadband connection it took 15 minutes to download. A lot faster than the postman. Our video will show you our main menu screen where you can evaluate the videos and content of this set.

## Our Free Videos and Slide Styles

What is a Slide Style is the question we ask, but we also supply many Slide Styles for your use too. View our video, then our demo and download the styles to try them. Try our suggestion for a simple Slide Style as a pre-set for the more traditional Audio Visual enthusiast.
